card-making ideas

A few craft materials can transform plain paper into wonderfully unique and personal greeting cards. Here are some creative ways to use paper, glitter, and embellishments to make both folded cards and pop-ups. Remember that beautiful cards needn't be elaborate: simple methods like layering paper, transferring shapes, or even affixing a dimensional flower sticker provide a truly special result.

folded cards

1 Cut solid craftstock to desired size and fold into a card. Glue ribbon around middle, then affix a square of patterned paper. Apply monogram stamp to a square of brown paper and cut out. Attach stamped square on top of patterned square with adhesive foam dots.

2 Make a card out of solid craftstock. Attach solid round stickers in a creative pattern. Overlap with empty transfer frames. (If desired, save transfer message for another project and add your own personalized message using alphabet transfers.)

card-making ideas

folded cards

3 Use a craft punch to create twenty squares in different colors and/or patterns. Arrange in a grid on a blank card and glue, then use stickers or stamps in an ornamental font to add your message.
